
TOPS TECH Task-4 (CS)

Task-4 Methods of Foot printing

- 1. Use the nslookup command to find the IP address of www.flipkart.com and note down any additional DNS information you discover.**

Ans:

- To find the IP address of www.flipkart.com using the nslookup command.

Command Used:

nslookup www.flipkart.com

Observation:

DNS Server: jiofiber

DNS Server Address: 192.168.29.1

Domain Name: www.flipkart.com

IP Address: 163.53.76.86

Additional Information:

- ➔ Non-authoritative answer was received from the DNS server.
- ➔ Alias Name: www.flipkart.com
- ➔ During repeated lookups, different IP addresses were observed because Flipkart uses load balancing and CDN services.

- Successfully found the IP address and DNS information of www.flipkart.com using the nslookup command.

TOPS TECH Task-4 (CS)

2. Perform a Google dorking search to find any public Instagram profiles from your college domain (e.g., site:instagram.com "@yourcollege.ac.in") and list the first 3 results you find.

Hint: Try different queries to refine your results.

Ans:

Google Dorking Search

Objective:

- To identify public Instagram profiles related to TOPS Technologies using Google Dorking.

Search Query Used:

site:instagram.com "Tops Technologies"

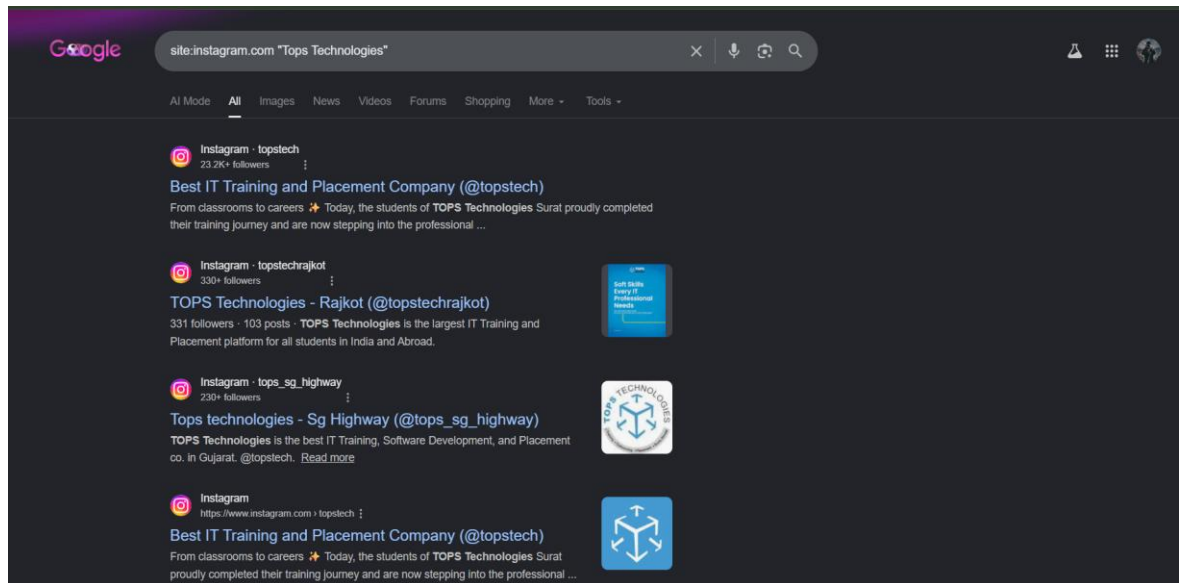

Findings:

Sr. No.	Instagram Profile
1	@topstech
2	@topstechrajkot
3	@tops_sg_highway

Observation

- The Google Dork query successfully identified public Instagram profiles related to TOPS Technologies. The search results show different branch and official Instagram accounts indexed by Google.
- Google Dorking is an effective footprinting technique for discovering publicly available information and social media profiles associated with an organization.

TOPS TECH Task-4 (CS)

3. Use the whois tool (online or command line) to gather registration details for the domain **zomato.com** and summarize the organization name, country, and registration date.

Ans:

WHOIS Lookup/WHOIS.com for zomato.com

Objective:

- To gather domain registration information of **zomato.com** using a WHOIS.com service.

Observation:

- The WHOIS.com provided information about the domain owner, registration details, registrar, and domain creation date. This information helps identify the organization responsible for the domain.
- ⇒ WHOIS is an important foot printing technique that helps security professionals collect publicly available registration information about a domain.

TOPS TECH Task-4 (CS)

Findings:

<u>Parameter</u>	<u>Details</u>
Domain Name	zomato.com
Registrar	101domain GRS Limited
Country	IN (India)
Registration Date	2006-02-24
Expiry Date	2033-02-24
Last Updated	2023-05-22
Status	Client Transfer Prohibited, Server Delete Prohibited, Server Transfer Prohibited, Server Update Prohibited
Name Servers	ns-1286.awsdns-32.org, ns-1692.awsdns-19.co.uk, ns-290.awsdns-36.com, ns-671.awsdns-19.net

TOPS TECH Task-4 (CS)

4. Identify all subdomains of myntra.com using a free online tool like SecurityTrails or crt.sh and list at least 3 subdomains you find.

Ans:

Subdomain Enumeration of myntra.com

Objective:

- To identify subdomains associated with myntra.com using a subdomain enumeration tool.

Tool Used:

- crt.sh (Certificate Transparency Logs)

Search Query:

%myntra.com

Findings

<u>Sr. No.</u>	<u>Subdomain</u>
1	delivery.myntra.com
2	jobs.myntra.com
3	financeeng.myntra.com

- ⇒ The actual subdomains may vary depending on the current crt.sh results. Use the subdomains that appear in your search results.

Observation:

- ⇒ Subdomain enumeration revealed multiple subdomains associated with myntra.com. These subdomains represent different services and resources used by the organization.

TOPS TECH Task-4 (CS)

- ⇒ Subdomain enumeration is an effective foot printing technique that helps identify publicly accessible assets belonging to an organization. This information can be useful during security assessments and reconnaissance activities.

5. Pick any one method of footprinting (DNS lookup, whois, Google dorking, subdomain enumeration) and record a short screen capture (max 2 minutes) showing your process and findings for a popular Indian app domain (not the same as above).

Ans:

Screen Recording of Footprinting Technique

Objective:

- To perform footprinting using WHOIS Lookup and collect domain registration information of a target website.

Method Selected:

- WHOIS Lookup

Tool Used:

- WHOIS.com (Website)

TOPS TECH Task-4 (CS)

Target Domain:

- zomato.com

Findings:

- The WHOIS lookup revealed the following details for the target domain:
 - Domain Name: zomato.com
 - Registrar: 101domain GRS Limited
 - Registration Date: 2006-02-24
 - Expiry Date: 2033-02-24
 - Last Updated: 2023-05-22
 - Country: India

Status:

- Client Transfer Prohibited
- Server Delete Prohibited
- Server Transfer Prohibited
- Server Update Prohibited

Name Servers:

- ns-1286.awsdns-32.org
- ns-1692.awsdns-19.co.uk
- ns-290.awsdns-36.com
- ns-671.awsdns-19.net

Observation:

- The WHOIS search showed that the domain has been registered for a long period and is protected with multiple security restrictions that prevent unauthorized transfer, deletion, or modification. The domain uses multiple AWS DNS name servers to ensure reliable and continuous availability of services.
- ⇒ WHOIS Lookup successfully provided important registration and DNS information about the target domain. This technique is useful during the foot printing phase to gather publicly available information about an organization's online infrastructure.
